KEY PROJECTS

Veda AI - AI Assisted LMS
Introduced multiple agents on the LMS to automate time taking tasks like evaluation, content generation, writing assistance, interviewing and onboarding.
Created a AI companion deeply integrated in the interface to face learner queries at any stage of learning

Website Builder - Website building for boomers
Created builder version 3, based on the experience on version 2, fulfilling common user demand. CMS, CDN solved.

Revamping Edmingle.com
Took 2 months with the help of PM and Visual Designer to revamp the entire website with triple the amount of pages for a better SEO.

Jumping to Design Engineering
Directly making the frontend with design finesse to reduce dev time by 40%. Tools used: Cursor, Github and Figma MCP.

Graphical Automation
Automated app graphics for iOS and android reducing Go live time by 30%.
